PROJECT ABSTRACT:

In modern era of fast moving world and busy schedule of people, media in playing a vital role. TV news channel plays a very conspicuous role in providing the current news about social and political information's which keep the masses informed about the latest developments in the current affairs on National and International level. TV news channel has carved an immensely significant niche in our modern set up of live that its indispensability cannot be under estimated.

Besides, TV Channel is a source which keeps ostensibly informed about the scientific and technological advancement through research and innovation by bringing into limelight through Advertisements new products, gadgets, etc. for improving the quality of our mode of living.

PROJECT NEED:

In response to competition from international 24-hour news channels, and with the aim of winning back the national audience, which is increasingly turning to social networks, to set up and launch its new all-news channel, . This project will support the broadcaster in its ambitious bid to develop a modern, reactive and interactive news service for viewers and Internet users.

The goal is make the content broadcast on air available online, in collaboration with the newsroom, producing specific content while ensuring visibility on social networks.

Specific training focusing on managing the public and publishing its reactions is also planned, this being a necessary condition for the establishment of a credible, recognized interactive service.

PROJECT USAGE:

Internet television is common in mostly used in now days. About one in four new televisions being sold is now a smart TV.

Considering the vast popularity of news and devices, much of the public can watch television via the internet. Internet-only channels are now established enough to feature some Emmy-nominated .Many networks also distribute their shows the next day to streaming providers. Some networks may use a proprietary system. This has resulted in bandwidth demands increasing to the point of causing issues for some networks.

Users downloaded an application and data would be shared between the users rather than the service provider giving the now more commonly used streaming method. Now most service providers have moved away from the systems.. The service was selected because the existing infrastructure could not handle the bandwidth necessary for centralized streaming distribution. Some consumers didn't like their upload bandwidth being consumed by their video player, which partially motivated the roll-out of centralized streaming distribution.

BENEFITS OF PROJECTS:

In this article, I have discussed about what are the benefits of watching news channels daily. News channels are really a part of essential needs of entertainment. It is entertainment because it will fulfil the needs of the mind regarding knowledge. News channels have several benefits and they can be helpful for any class of people. Let us have a detailed study about to whom and how they are helpful.

News channels are usually a main part of TV entertainment and there is no person who loves to watch TV can say that he never watches news. Also a person who lives in this world has to do something regarding gaining latest knowledge in miscellaneous fields. News is very important in any field as they make us aware of latest trends, changes and the conditions of the world.

Every person has some needs of news channels and they are benefitted through them in many ways.
