PROJECT ABSTRACT:

Water is the most essential resource and we can't function without it. The existing system for water supplying is having more drawbacks such as delay in delivering water to customers, Low quality of water, cost of the water is high and most importantly customer has to go to the water plants so that it can take lots of time. To overcome the above draw backs which are present in the existing system, we developed a new service called Online Water booking & services. By using this website anyone can book the water anytime from anywhere. It is more useful and advanced water booking compare to the previous existed systems. The advantages of this system are Proper utilization of water, Less Human effort, Quality &safety water, delivery of the water is very speed, no need to go to water plants directly we can book ,cost of the water is economical, payments can be Make through online banking and debit card/credit card.

PROJECT NEED:

Water is an essential nutrient and is to our body what oil is to a car; we can't function without it. Our bodies are 50 to 70 percent water, and much of that water has to be replaced every day. Don't wait until you are thirsty to replace fluids. So many people around our region don't have access to safe water and access to adequate sanitation. Women and children spend more than four hours walking for water each day, and more than people die each year from water-related diseases.Now a days in this busy lifestyle we don't have enough time to get the water. There was a period, quite recently, when we needed to remain in wait in long lines to get drinking water. So get rid of this hassle and to save the time we need online website for water booking as well as service.

PROJECT USAGE:

Here we present online water booking& service. You can now book water bills through the comfort of your home using our website over mobile phone or desktop in few easy clicks. All you need to do is just login to our web portal, book the water & amount and that's it. By using our website you can easily get safe water and you can save your valuable time also.

BENEFITS OF PROJECT:

We are here to bring "safe water" and sanitation to the people through access to small, affordable costs. When people have access to safe water, they get time back to go to school, earn an income and take care of their family. It changes their world.

No need to wait for hours to get the drinking water. Experience speedy service at our website! No more delays in bringing water, pay online here from anywhere & anytime. We offers you the most convenient & secure payment platform, you can book water online through the method of your choice i.e. Debit/Credit Card, Net banking instantly. Paying & booking water online at our web portal is the most supportive & convenient process.
