COURSE SYLLABUS:-

III Year – I SEMESTER

T P C 3+1* 0 3

CE503-DESIGN AND DRAWING OF REINFORCED CONCRETE STRUCTURES

Lecture: 3 hrs/Week Internal Assessment: Marks

Tutorial: 1 Hrs/Week Semester End Examination: Marks

Practical: -- Credits: 3

Course Learning Objectives:

The objective of this course is:

- 1. Familiarize Students with different types of design philosophies
- 2. Equip student with concepts of design of flexural members
- 3. Understand Concepts of shear, bond and torsion
- 4. Familiarize students with different types of compressions members and Design
- 5. Understand different types of footings and their design

Course Outcomes:

At the end of this course the student will be able to

- a. Work on different types of design philosophies
- b. Carryout analysis and design of flexural members and detailing
- c. Design structures subjected to shear, bond and torsion
- d. Design different type of compression members and footings

SYLLABUS:

UNIT -I

Introduction: Working stress method Design codes and handbooks, loading standards – Dead, live, wind and earthquake loads, elastic theory, design constants, modular ratio, neutral axis depth and moment of resistance, balanced, under-reinforced and over-reinforced sections, working stress method of design of singly and doubly reinforced beams.

Limit State Design: Concepts of limit state design – Basic statistical principles – Characteristic loads –Characteristic strength – Partial load and safety factors – representative stress-strain

curves for cold worked deformed bars and mild steel bars. Assumptions in limit state design – stress – block parameters – limiting moment of Resistance.

UNIT -II

Design for Flexure: Limit state analysis and design of singly reinforced sections- effective depth- Moment of Resistance- Doubly reinforced and flanged (T and L) beam sections-Minimum depth for a given capacity- Limiting Percentage of Steel- Minimum Tension Reinforcement-Maximum Flexural Steel- Design of Flanged Sections (T&L)- Effective width of flange –Behavior- Analysis and Design.

UNIT - III

Design for Shear, Torsion and Bond: Limit state analysis and design of section for shear and torsion – concept of bond, anchorage and development length, I.S. code provisions. Design examples in simply supported and continuous beams, detailing. **Limit state design for serviceability:**

Deflection, cracking and code provision, Design of formwork for beams and slabs.

UNIT – IV

Design of Compression members: Effective length of a column, Design of short and long columns – under axial loads, uniaxial bending and biaxial bending – Braced and un-braced columns – I S Code provisions.

UNIT-V

Footings: Different types of footings – Design of isolated and combined footings - rectangular and circular footings subjected to axial loads, uni-axial and bi-axial bending moments.

UNIT - VI

Slabs: Classification of slabs, design of one - way slabs, two - way slabs, and continuous slabs using IS Coefficients (conventional), design of waist-slab staircase.

NOTE: All the designs to be taught in Limit State Method

Following plates should be prepared by the students.

- 1. Reinforcement detailing of T-beams, L-beams and continuous beams.
- 2. Reinforcement detailing of columns and isolated footings.
- 4. Detailing of one-way, two-way and continuous slabs and waist-slab staircase.

INTERNAL EXAMINATION PATTERN:

The total internal marks (30) are distributed in three components as follows:

1. Descriptive (subjective type) examination: 25 marks

2. Assignment: 05 marks

FINAL EXAMINATION PATTERN:

The end examination paper should consist of Part A and Part B. Part A consists of two questions in Design and Drawing out of which one question is to be answered. Part B should consist of five questions and design out of which three are to be answered. Weightage for Part – A is 40% and Part- B is 60%.

TEXT BOOKS:

- 1. 'Limit State Design' by A. K. Jain
- 2. 'Design of Reinforced concrete Structures' by N. Subrahmanyian
- 3. 'Reinforced Concrete Structures' by S. Unnikrishna Pillai & Devdas Menon, Tata McGraw Hill, New Delhi.

REFERENCES:

- 1. 'Design of concrete structures' by Arthus H.Nilson, David Darwin, and Chorles W. Dolar, Tata McGrawHill,3rd Edition, 2005.
- 2. 'Reinforced Concrete Structures' by Park and Pauley, John Wiley and Sons.

IS Codes:

- 1) IS -456-2000 (Permitted to use in examination hall)
- 2) IS 875
- 3) SP-16
